

12-transmitter 12-receiver module

Preview

The SNAP12 Transmitter and Receiver modules enable high performance multi-channel optical links designed for very short reach (VSR) high-speed data communication and computing applications where bandwidth bottlenecks are incumbent. These modules are well suited for high-bandwidth commercial aerospace systems with the added benefit of reducing aircraft wiring and system. ?Excellent Anti-interference?Excellent anti-interference performance and stable transmission make the T12D radio control range up to 2. All 12 channels of T12D with 3ms fast response. ?Main External Modules Support?Supports ELRS (ExpressLRS), TBS Crossfire, and other mainstream. Unlock advanced control with the Radiolink T12D ELRS 12-channel transmitter and R12F receiver, featuring SBUS+CRSF+PWM signal compatibility and a robust 4096 channel resolution for precise RC maneuvers. Rich user-defined functions can satisfy almost all products from engineering vehicles, and robots, to turbojet aircraft. It features a practical case that fits comfortably in.

AT10II is a 12-channel PC transmitter for hobby and sports model builders, designed for the comfortable control of all currently common models: acrobatic motor models, gliders, helicopters, multirotors,

The Spektrum AR12310T PowerSafe receiver is a feature-packed 12 channel receiver with integrated full-range telemetry. Each come with built-in connection

SNAP12 Transmitter and receiver modules are fiber optic modules for parallel optical data communication applications. These modules are compliant to the SNAP12 MSA and are primarily used

Learn about the HC-12 transceiver module and how to use it to transmit and receive digital data. The HC-12 is a half-duplex wireless serial communication module with 100 channels in the 433.4-473.0

Unlock advanced control with the Radiolink T12D ELRS 12-channel transmitter and R12F receiver, featuring SBUS+CRSF+PWM signal compatibility and a robust

433 Mhz Wireless Remote Control Switch DC 12V 10A 1CH relay 433Mhz Receiver Module For EV1527 learning code Transmitter Remote

The HC-12 is a 100mW multi-channel wireless transceiver you can use in your projects to transmit and receive serial information.

The universal asynchronous receiver-transmitter (UART) takes bytes of data and transmits the individual bits in a sequential fashion. At the destination, a

12-transmitter 12-receiver module

Radiolink T12D 12 Channels RC Transmitter and R12F Receiver, Support ELRS Long-Range Module, 2.4GHz Remote Radio Controller for RC Airplane, Drone,

Unlock advanced control with the Radiolink T12D ELRS 12-channel

12V Relay Remote Switch Wireless RF Remote Control Switch 4 Channel Relay Module 433Mhz Transmitter Receiver Kit Universal Remote Controller for Lights

T12D, with 12 fully-proportional channels, exceeds the current high-end twelve channels remote control which is only eight fully-proportional channels. Rich user-defined functions can satisfy almost all

The RadioLink T12D is a cutting-edge 12-channel fully-proportional transmitter designed for advanced pilots, drone racers, and robotics engineers. It features an embedded freeRTOS + LVGL GUI

Unlock advanced control with the Radiolink T12D ELRS 12-channel transmitter and R12F receiver, featuring SBUS+CRSF+PWM signal compatibility and a robust 4096 channel resolution for precise

SNAP12 is a 12-channel pluggable parallel optical transmitter or receiver module with an MSA standard chassis mountable MPO interface. It is a self-contained, electrical to optical converter, which requires

We are committed to providing high-performance transmitters, flight controllers, receivers, RTK modules, ESCs, and chargers. We also provide integrated
