

135-degree elbow cable tray

Preview

The Trough Type 135° Horizontal Elbow is a core accessory of the trough cable tray system, specially engineered to achieve a 135-degree horizontal direction change for horizontal trough cable trays. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. SFSP cable trays and accessories from SFSP are manufactured from steel sheets in accordance with BS EN 10130/BS EN 10131/ BS EN. Ensure your cable tray solution is designed for your application, with our vast range of ladder tray fittings. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. They are Reliable, Adaptable, Low-Maintenance, Low-Cost and Safe choices. Cable tray wiring systems offer significant advantages over conduit pipe and other wiring systems.

Elbow cable trays can fit into a corner to hold up, organise, and distribute your cable. With holes crafted for optimal airflow around the cables, you can also use cable

Horizontal 90 degree bend perforated electrical cable tray, manufactured from pre galvanized steel (GI), outside flange, 1.5mm thick, 100mm height, 150mm width, reducing the risk of overheating and
