

5050 Cable Tray Unit Price

Article Overview

5050 cable trays typically range from \$15 to \$50 per unit depending on material, length, and supplier.

Price Overview

The cost of a 5050 cable tray (50 mm width x 50 mm height) varies based on material, length, and type:

- o PVC Cable Trays: Lightweight, fire-resistant, and suitable for office or server room installations. For example, a 2-meter PVC 5050 cable tray from StarTech.com is priced around \$20-\$30 per piece depending on the retailer and shipping options .
- o Galvanized Steel Cable Trays: More durable and suitable for industrial or heavy-duty applications. Prices for galvanized steel 5050 trays generally range from \$25 to \$50 per meter, with bulk orders potentially reducing the cost .
- o Overhead Hanger Systems (HU 5050): These are steel U-profile hangers for mounting cable trays, with dimensions like 50x50 mm. Pricing is typically quoted per piece and depends on length and galvanization, often in the \$15-\$40 range per hanger .

Factors Affecting Price

- o Material: PVC is cheaper than steel or aluminum.
- o Length: Standard lengths are 2 meters (6.5 ft) or custom sizes; longer trays cost more.
- o Supplier and Certification: CE-certified or UL-listed trays may carry a premium.
- o Quantity: Bulk purchases often reduce the per-unit cost.

Buying Tips

- o Compare suppliers on platforms like Alibaba for industrial-grade trays or StarTech for office/server setups .
- o Check for fire resistance ratings and UL/CE certifications if required for safety compliance.
- o Consider accessories like mounting brackets, covers, and connectors, which may add to the total cost. In summary, a single 5050 cable tray can cost anywhere from \$15 to \$50, with industrial steel versions on the higher end and PVC office trays on the lower end. Bulk orders and supplier negotiations can further influence the final price.

The tray is sold in packs of 8, making it an economical choice for both professional installers and larger projects. Thanks to its
