Power Distribution Module Replacement Instructions Introduction This publication describes the replacement procedure for the power distribution module (PDM) in 4100U and 4100ES Fire Alarm

The Simplex 4100-0634 Power Distribution Module (PDM) provides reliable power distribution for Simplex fire alarm systems. Designed for use with the 4100

WARNING: To reduce risk of electrical shock, always replace the cover to the power distribution box before reconnecting the battery or refilling fluid reservoirs. The

Learn about power distribution boards: their uses, role, and how they work to manage electrical power distribution efficiently and safely in various setups.

Be sure that the power distribution box has sufficient power provided to it. Long cable runs can result in a voltage drop, which can be solved by using a heavy gauge wire. Check wires/DIN terminal clasps

Use a volt meter to measure voltage at the power supply and at the power distribution box. Be sure that the power distribution box has sufficient power provided to it. Long cable runs can result in a voltage
