

Can a USB flash drive be used with a mobile fiber optic router

Preview

To set this up, you just need to plug a USB flash drive or hard drive into your router. Your router should automatically detect it and make the storage available over your Wi-Fi network. However, accessing your USB drive connected to your router can be a daunting task, especially for those who are not tech-savvy. You can do things like saving and sharing files, mobile charging, or even an automatic backup of your data.

Optical Products Fiber Optic Modules and Components An extensive portfolio of high-density, high-speed optical interconnects designed for wired networking

^ Other terms used to describe various hard disk drives include disk drive, disk file, direct access storage device (DASD), CKD disk, and Winchester disk drive (after

If you want an easy way to share a drive with all of the computers and devices in your home network, take a look at your router and use a USB drive.

Many modern routers include a small file-sharing server built-in. By using this feature, your USB stick becomes shared storage that's always available to anyone on your home network --
