Our cable tray punching machine adopts a high-precision hydraulic or servo punching system, ensuring consistent hole accuracy, smooth edges, and high production efficiency. This makes the cable tray punching machine ideal for mass production as well as customized cable tray. Canadian customers discussing technical details of cable tray production line with ZTRFM engineers in factory The Canadian customers carefully inspected the complete production process of the automatic trough cable tray line, including decoiling, leveling, hydraulic punching, roll forming. Cable tray manufacturing relies on a coordinated production line of specialized machines: a roll forming line shapes the profile, a CNC press brake handles secondary bending, a punch press creates mounting holes and ventilation slots, and a shearing line cuts the finished tray to length. Together. The cable tray machine is a specialized production equipment designed for manufacturing various specifications and models of cable trays, including trough-type, ladder-type, and tray-type structures. Utilizing advanced automation technology combined with precise punching, bending, and cutting. Therefore, to make the essential component for the electrical industry, our company is designing Cable Tray Punching Machines that are mechanical and semi-automatic in nature. These machines are constructed in small structures that make the installation very simple and quick.

We are engaged in offering Automatic Cable Tray Metal Punching Machine to our clients. All our products range has been widely appreciated by our clients.

It combines rolling, punching, cutting and forming in one, realizing full automation with consistent product quality. The machine is user-friendly, durable and highly adaptable to different specifications,

Equipped with durable rollers, robust frames, and reliable hydraulic units, the cable tray punching machine can handle a wide range of tray sizes and thicknesses. It

Our cable tray punching machine is designed with user-friendly control systems, including PLC touch screens, automatic feeding, and safety protection devices. The stable structure and high-quality

Cable Tray Roll Forming Machine This line can produce various sizes of cable trays and tray covers Whatever the width, height, length you wanted Thickness range

The Layout of Cable Tray Manufacturing Machine All as we know that, cable trays are perforated and bended into a C type. So the cable tray manufacturing

Utilizing advanced automation technology combined with precise punching, bending, and cutting processes, this machine efficiently completes the forming and

Canadian cable tray punching machine

The punching machine is designed for high-volume operations, allowing manufacturers to produce a large number of cable trays in a short period. This speed translates into higher output and greater

This guide walks through each core machine, how they fit into a typical production line, what specifications to evaluate, and how to match machine choices to the cable tray types and

Therefore, to make the essential component for the electrical industry, our company is designing Cable Tray Punching Machines that are mechanical and semi

CNC cable tray punching machines serve even higher efficiency and precision to ensure machining operations are done consistently. With CNC machines, punching patterns, dimensions, and

The cables and wires in bulk cannot be installed and secured properly without cable trays. Therefore, to make the essential component for the electrical industry, our company is designing Cable Tray

With years of experience in cold roll forming equipment manufacturing, ZTRFM continues to provide customers worldwide with reliable production solutions for cable tray production line, cable tray

High-speed cable tray punching machine for trough trays, integrating roll forming, hydraulic punching, and cutting to ensure accuracy, durability, and efficiency.

The cable tray punching machine is an essential piece of equipment in modern industrial and construction projects. It plays a pivotal role in fabricating cable

Our machine production works are focused on establishing a metal cable tray production facility. And again, our company conducting business in electrical
