

Article Overview

SLA Company Limited, CiscoSuppliers.com, and Song Nhan Technology are key suppliers in Vietnam for carrier-grade routers compatible with silicon photonics applications.

SLA Company Limited

SLA Company Limited distributes a wide range of routers and networking products in Vietnam, partnering with major brands such as Cisco, Aruba Networks, TP-Link, Ubiquiti, Mikrotik, and Zyxel . Their offerings include ISP routers, firewalls, load balancers, and WAN connectivity solutions, which are suitable for high-performance, carrier-grade deployments. SLA provides technical support and integration services, making them a reliable choice for enterprises and telecom operators seeking silicon photonics-compatible infrastructure.

CiscoSuppliers.com

CiscoSuppliers.com supplies genuine Cisco routers, switches, and firewalls across Vietnam, including Ho Chi Minh City and Hanoi . They offer factory-sealed, serial-verified equipment with full manufacturer warranties. Their portfolio covers ISR, ASR, and Catalyst 8000 series routers, which are widely used in carrier-grade networks and can integrate with silicon photonics modules for high-speed optical connectivity. They also provide end-to-end logistics, customs documentation, and rapid delivery, supporting large-scale deployments.

Song Nhan Technology

Song Nhan Technology specializes in telecommunications solutions, including fiber optic cables and connectivity equipment essential for silicon photonics applications . Their products support OLT-GPON systems and other high-speed optical networks, making them suitable for integration with carrier-grade routers that leverage silicon photonics for enhanced bandwidth and low-latency performance.

Additional Considerations

- o Integration Support: Ensure the supplier provides technical guidance for integrating silicon photonics modules with routers.
- o Warranty and Certification: Verify that equipment comes with manufacturer warranties and certifications for carrier-grade reliability.
- o Local Availability: SLA and CiscoSuppliers.com offer nationwide delivery and support, which is critical for large-scale deployments.
- o Customization: Song Nhan Technology can provide tailored fiber optic solutions to match specific silicon

photonics requirements. These suppliers collectively cover high-performance routers, optical connectivity, and integration support, making them suitable partners for deploying carrier-grade silicon photonics networks in Vietnam .
