

## Article Overview

Custom vibration optical cables typically range from \$0.20/m to \$15/m depending on fiber count, armoring, environmental protection, and assembly complexity.

## Base Cable Pricing

- o Indoor PVC cables: \$0.20-\$1.50 per meter, suitable for low-stress environments .
- o Outdoor or armored cables: \$6-\$15 per meter, designed for mechanical stress, UV exposure, and chemical resistance .
- o High-strand-count cables: Prices increase with fiber count; for example, a 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot .

## Custom Assembly Costs

- o Pre-terminated assemblies: Factory-terminated cables with connectors, overmolds, or waterproof seals increase costs significantly .
- o Connector types: LC, SC, ST, or MPO connectors affect pricing; more complex or environmentally sealed connectors are more expensive.
- o Specialized vibration-resistant designs: Cables engineered to withstand vibration or mechanical stress may require additional armoring or reinforced jackets, further increasing cost.

## Factors Influencing Price

- o Environmental protection: LSZH, plenum, fire-safe, or chemical-resistant jackets add to cost .
- o Mechanical reinforcement: Armoring, braid layers, or vibration-damping materials increase labor and material costs .
- o Fiber type: Single-mode fibers are generally less expensive than multimode fibers for the same strand count .
- o Compliance and certifications: Telcordia GR-326, ISO9001, TL-9000, or other industry certifications can affect pricing .

## How to Obtain a Detailed Quote

For precise pricing tailored to your requirements, it is recommended to contact manufacturers directly:

- o Amphenol Custom Cable: Offers domestic and offshore manufacturing, TL-9000 certified, and supports large deployments with custom assemblies .
- o Optical Cable Corporation (OCC): Provides expert consultation to configure cables for specific environments and delivers detailed quotes upon request .
- o Custom Cable Configurators: Platforms like [buy.customcable.com](http://buy.customcable.com) allow you to configure fiber type, strand

# Custom Price of Vibration Optical Cable

count, jacket, and connectors to receive a quote .

## Summary

While base prices for vibration-resistant optical cables range from \$0.20/m to \$15/m, the final cost depends heavily on fiber count, environmental protection, armoring, connector type, and assembly complexity. For a comprehensive and accurate price list, engaging directly with manufacturers or using online configurators is the most effective approach to obtain tailored quotes and ensure compliance with your project requirements .
