

Direct supply of Norwegian fiberglass cable trays

Article Overview

You can order high-quality Norwegian fiberglass cable trays from suppliers like Oglaend System and Nordic Wire Tray, offering customizable FRP/GRP solutions for industrial and offshore applications.

Key Norwegian Suppliers

Oglaend System Founded in Sandnes, Norway, Oglaend System specializes in multidiscipline support systems, including fiberglass cable trays suitable for both onshore and offshore projects. Their trays are available in various heights, widths, and slot patterns for optimal cable management. They also provide a wide range of brackets, fittings, and accessories to ensure stable and compact installation. Oglaend System has factories in Norway, Malaysia, and China, with global sales companies offering local stock and fast delivery . You can explore their products and request quotes directly on their website. Nordic Wire Tray (NWT) NWT offers the X-Tray series, a premium cable tray system that includes fiberglass options. Their trays are customizable to project-specific requirements, with long bracket spacing for easier installation and fewer fasteners. NWT emphasizes fast delivery, high-quality materials, and compliance with IEC 61537 standards. They also provide expert guidance to select the right tray for your installation environment . Orders can be placed online or through their sales team for tailored solutions.

Fiberglass Cable Tray Features

Fiberglass (FRP/GRP) trays offer several advantages over traditional steel trays:

- o Non-conductive and non-magnetic, reducing electrical hazards and interference with sensitive equipment
- o Corrosion-resistant, ideal for harsh environments such as offshore oil & gas or chemical plants
- o Lightweight yet strong, with a strength-to-weight ratio surpassing steel, simplifying installation and reducing transportation costs
- o UV and flame resistant, with options for polyester or vinylester resin systems and surface veils for long-term durability

Ordering Tips

- o Determine your project requirements: Consider load capacity, cable type, environmental conditions, and installation space.
- o Select material and resin type: Polyester or vinylester resins are available, with custom colors and UV protection options.
- o Request customization: Both Oglaend System and NWT can produce trays to specific dimensions, bends, and configurations.
- o Check stock and lead times: Standard ranges are often in stock for fast delivery, but custom orders may

Direct supply of Norwegian fiberglass cable trays

require additional lead time.

o Consult technical support: Suppliers provide guidance on installation, bracket spacing, and compliance with safety standards. For direct ordering, visit Oglaend System's cable tray page or Nordic Wire Tray's product page, where you can request quotes, check stock availability, and discuss project-specific customization .
