Fully automated wire processing including length-cutting, stripping, fitting with wire end ferrules and labelling. A modular design and standardized operation ensure flexibility, efficiency, and seamless integration into your production. Depending on the variant, the new, compact Wire Terminal WT fully automated wire assembly machines can produce up to 36 different wires in cross-sections ranging from 0. The company's. Generate Instant Quote - Create and download quotes instantly for review or approval. Place Order - Seamlessly place your order with just a few clicks.

We provide precision slitting, die-cutting, rewinding, waterjet cutting, ultrasonic welding, creasing/cuffing, and custom converting services, including laminating and precision laser cutting.

The Sch#228;fer Group specializes in the development and manufacture of tooling as well as standard and special machines configured as bench-top machine, semi

Mobile, modular assembly system consisting of standard cable processing machines and industrial printers. The modules are interconnected via integrated

Blog The Complete Guide to Distribution Box: Installation, Types & More By Admin Aug 2, 2025 No Comments # distribution box Introduction Electrical systems power our homes, offices, and

Find the best wire drawing equipment for your manufacturing needs. Learn key factors, machine types, and how to boost efficiency with the right

Why use passive distribution boxes in your I/O systems Schuster Maschinenbau GmbH from Denklingen, Germany has found that passive distribution boxes are

Fully automated wire processing including length-cutting, stripping, fitting with wire end ferrules and labelling. As well as project-specific order picking into the

Fully automates cutting to length, stripping and crimping of wires boosting productivity and ensuring consistent and precise quality Eight internal spools of wire and external accessories for additional

The Komax Group offers a comprehensive range of wire processing solutions - from fully and semi-automated machines to wire handling tools and custom

# Distribution Box Wire Processing Machine

The Weidmüller Wire Processing Center (WPC) offers an ideal solution for the semi-automation and increases efficiency in cable assembly by up to 80%. The WPC

Learn the step-by-step distribution box manufacturing process--from design and material selection to assembly and testing. E-abel provides high-quality electrical

Electrical box gap punch Distribution board panel forming process tooling Electrical Box Machine Bending Tooling Distribution box production line technology

The Wire Processing Center can be tailored to the individual workstation and can be integrated into existing structures. If initially only individual components (machine or printer) are used in production,

Using innovative busbar power technology, Rittal's industrial power distribution solutions optimize AC and DC applications for use on a global scale.

At Judco, we take wire processing seriously. Our department processes up to 2.5 million wires monthly and is equipped with Komax and Koder machines. Our

our advanced automatic wire processing machine for a complete wire harness automation line. From cutting to crimping, optimize every automatic
