

Do you still need a router if your fiber optic box has built-in Wi-Fi

Preview

While fiber internet doesn't require a modem, you still need a router to distribute the connection across your network. Your router works hand-in-hand with the ONT, taking the internet signal and spreading it wirelessly or through Ethernet cables to all your connected devices. If you're paying for gigabit fiber service, make sure your router supports at least gigabit Ethernet ports and dual-band or tri-band WiFi (like. Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network Terminal. Upgrading to a Wi-Fi 6 or 6E router helps you get the full benefit of symmetrical fiber speeds. ONTs deliver simpler setup, higher speeds, and lower latency for video and VoIP. If your ISP supplies a combo gateway, enable bridge/ONT mode to use your own router and avoid double NAT. Does Fiber Internet Service Include Wi-Fi? The allure of fiber optic internet is. When setting up the internet in your home, you'll often hear about modems and routers. They are two distinct devices with different functions.

With three 10Gbps ports and tons of useful capabilities, Ubiquiti's new UniFi Cloud Gateway Fiber (UCG-Fiber) is the

Key Takeaways: Yes, you can use your own router with fiber internet, as long as it has a

Any standard router, including the primary unit of a mesh Wi-Fi system, will work at its full potential with any standard

Learn about essential fiber internet equipment including ONTs, fiber routers, and setup
