

Article Overview

Eurotray and EAE Electric are leading Eastern European manufacturers of cable trays and related support systems.

Eurotray Support Systems

Eurotray is a prominent manufacturer based in Turkey, which is often considered part of the Eastern European industrial market. They produce a wide range of cable management systems, including trays, mounting supports, direction-changing parts, and fittings designed for low, medium, and high voltage cables. Their products are suitable for data centers, food manufacturing plants, and industrial facilities, and they offer solutions for raised floor applications, vertical installations, and environments requiring high cable heating resistance. Eurotray provides galvanized, pre-galvanized, hot-dip, aluminum, and electrostatically painted trays, along with turnkey installation solutions and custom designs for special projects .

EAE Electric

EAE Electric operates in multiple countries, including Eastern Europe, and specializes in modular cable trays and busbar systems. Their products are manufactured using the roll forming method and standard tray lengths of 3 meters. EAE offers flexible solutions for offices, plants, data centers, electric vehicle charging stations, and tunnels, with support systems for vertical and horizontal installations. They also provide BIM-compatible solutions for project planning and management, ensuring efficient and safe cable routing .

Additional European Manufacturers

While not exclusively Eastern European, other companies with operations in the region include:

- o Spina Group (Italy): Offers stainless steel, galvanized, and wire-mesh cable trays for industrial and infrastructure projects, with ladder, perforated, and closed-bottom types. They provide modular accessories and protective covers for indoor and outdoor use .
- o Niedax Group (Germany): Operates subsidiaries in Eastern Europe, including FEMI-CZ, providing steel, aluminum, PVC, and GRP cable support systems with full technical support and project management .

Key Considerations

When selecting an Eastern European cable tray manufacturer, consider:

- o Material and finish: Galvanized steel, aluminum, or stainless steel depending on environmental conditions.

- o Load capacity: Ensure the tray supports the intended cable weight.
- o Compliance: Look for EN and UL standards for safety and quality.
- o Customization: Availability of custom sizes, accessories, and turnkey solutions.
- o Project support: Technical assistance, BIM integration, and installation services. These manufacturers provide reliable solutions for industrial, commercial, and infrastructure projects, with a focus on durability, safety, and modularity.

As one of the best Cable Tray Manufacturers in Europe, we are trusted by people not only within the boundaries but even beyond

Founded in 2006 as a subsidiary of Imer Group, which has been operating in the steel industry for nearly 40 years, Eurotray is
