

Article Overview

Leading European manufacturers of ladder-type cable trays include Trayco, Spina Group, Eurotray, Niedax Group, Ebo Systems, and Eaton, offering durable, compliant, and customizable solutions.

Key Manufacturers

Trayco (Belgium) Trayco specializes in cable trays, mesh trays, and cable ladders, providing tailored solutions and installation guidance. Their products are designed for industrial and commercial applications, emphasizing optimization and compliance with European standards . **Spina Group (Italy)** Schiavetti Tekno, part of Spina Group, manufactures ladder-type cable trays in stainless steel, galvanised steel, and aluminium. Their trays are ventilated for heavy-duty industrial use, compatible with EN and UL standards, and available in standard and custom sizes. Accessories such as elbows, junctions, and covers ensure modularity and protection against environmental factors . **Eurotray (Turkey/Europe)** Eurotray offers a wide range of cable trays, ladders, and wire mesh trays suitable for large-scale installations. Their ladder trays are designed for high cable loads, vertical applications, and environments requiring industrial hygiene, making them ideal for data centers and food manufacturing plants . **Niedax Group (Germany)** Niedax provides over 50,000 products, including ladder and perforated trays, with a focus on durability and corrosion resistance. Their solutions are suitable for industrial, commercial, and infrastructure projects, adhering to European safety standards . **Ebo Systems (Europe)** Ebo Systems specializes in GRP (Glass-fiber Reinforced Polyester) cable trays, offering high corrosion resistance, thermal stability, and mechanical strength. Their ladder trays are suitable for extreme environments in energy, chemical, and water treatment industries . **Eaton (Europe/Global)** Eaton's B-Line series includes metallic and non-metallic ladder-type cable trays, wire basket systems, and cable fixing solutions. They provide extensive CAD/BIM design support and a wide range of materials and finishes for commercial and industrial applications .

Considerations for Selection

- o **Material:** Stainless steel, galvanised steel, aluminium, or GRP depending on corrosion resistance and load requirements.
- o **Compliance:** Ensure products meet EN, IEC, or UL standards for safety and reliability.
- o **Customization:** Many manufacturers offer custom widths, lengths, and accessories for complex installations.
- o **Application:** Choose ladder trays for heavy-duty, ventilated, or high-temperature environments; consider covers for outdoor or harsh conditions. These manufacturers provide robust, European-standard ladder-side cable trays suitable for industrial, infrastructure, and commercial projects, with options for customization and technical support.

DKC is a European leader, and offers a comprehensive range of cable tray systems and energy protection, transport and distribution

SFSP cable trays and accessories from SFSP are manufactured from steel sheets in accordance with BS EN 10130/BS EN 10131/
