This document discusses planning and surveying for fiber optic network routes. Fiber optic survey drawings and construction plans are essential to the success of the project, but the skills required to produce these drawings are not always available. That's where Design Presentation Associates comes in. However, before a single trench is dug or a cable is laid, there's a crucial first step that often determines the entire project's success or failure: Fibre optic cables are important for offshore operations. With virtually no delay and access to high-capacity broadband, you'll always have the right data on hand. So you can make informed decisions - whenever, wherever.
