

Article Overview

France has a robust cable tray manufacturing industry, producing a wide range of metal and non-metal cable management systems with advanced processing, customization, and export capabilities.

Leading Manufacturers and Production Capabilities

OB Profils, based in Prunay-Le-Gillon, manufactures and markets over 2,500 cable tray references, offering tailor-made solutions for diverse construction environments. Their production includes finishes such as Szndzimir, Electrozincplated, Hot Dip Galvanized, Magnelis(R), Zinc-Aluminium, Aluminium, Stainless steel, Epoxy, and PVC UV. OB Profils integrates logistics and replenishes storage multiple times daily to ensure availability for domestic and international deliveries, emphasizing sustainable practices like FSC/PEFC-certified packaging and eco-friendly transport . Niedax France is a major player with over 60 years of experience, specializing in metal cable support systems. They provide solutions for complex industrial, energy, transport, and infrastructure projects, producing perforated, ladder, and solid-bottom trays. Their factories are specialized by activity, allowing them to meet technical specifications for challenging environments . Other notable manufacturers include Gewiss, Cablofil (Legrand Group), and EAE Electric, which offer wire mesh trays, modular systems, and traditional cable trays designed for durability and flexibility across industries such as telecommunications, automation, and heavy industry .

Materials and Processing Techniques

French cable tray production involves metal forming, welding, perforation, and coating processes to ensure mechanical strength, corrosion resistance, and compliance with electrical safety standards. Materials commonly used include galvanized steel, stainless steel, aluminum, and coated metals, while non-metallic options like PVC provide UV resistance and chemical durability. Advanced machinery allows for custom dimensions, pre-spliced trays, and complex support structures, enabling rapid installation and adaptation to site-specific requirements .

Customization and Export

Manufacturers in France emphasize tailor-made solutions, offering accessories such as supports, derivation elements, and connection hardware. Many companies, including OB Profils, manage large export flows, preparing orders for international shipping and container stuffing. This ensures that French-made cable trays are available globally, maintaining high quality and compliance with international standards .

Sustainability and Innovation

French producers integrate eco-friendly practices, including certified packaging, low-emission transport, and energy-efficient production. Innovation focuses on modular designs, lightweight wire mesh systems, and pre-assembled trays to reduce installation time and improve safety on construction sites. In summary, French cable tray production combines advanced metalworking, diverse material finishes, customization, and sustainable logistics, making it a reliable source for both domestic and international cable management solutions.

French Manufacturer of Cable Trays Find us on : Building a sustainable future with OB Profils We deeply believe our organization

OB Profils, a French company located in Prunay-le-Gillon, designs, manufactures, and distributes cable trays and support systems

Cable tray ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal

Niedax France SAS With more than 60 years of experience, Niedax France, French manufacturer of metal

Cable Tray Production Line: A Comprehensive Guide In today's rapidly expanding infrastructure and industrial sectors,

Ladder Cable Tray Ladder Cable Trays are one of the most demanded products listed on the product catalogue of Brilltech. Being a

Explore the cable tray manufacturing process, types of cable trays, and important factors.

Explore the cable tray standards of 30 countries across five continents. Learn about the key

Expert in support structures for cables and electrical appliances, NIEDAX is France's preferred supplier of equipment systems for

A modern cable tray production line typically consists of several key components that work in unison to ensure efficiency and quality.

With the help of cable tray production machinery lines practical control panel, software and work

Thanks to our powerful and flexible 100% French production facilities, we develop cable trays and support systems which respond to

French cable tray processing and production
