

Article Overview

Key Greek brands for voltage distribution boxes include GEYER, Armet, Insula Electric, and Ilvief, covering low, medium, and high voltage applications.

Notable Greek Manufacturers and Suppliers

GEYER specializes in low voltage electrical equipment, including distribution boards and miniature circuit breakers, making it a prominent brand for residential and industrial distribution solutions . Armet produces SMC/GRP/FRP polyester meter boxes, cabinets, and distribution boxes, including options for single and three-phase systems, underground distribution, and smart meter integration. Their products comply with international standards (EN/IEC, ISO, DIN, ASTM) and are suitable for outdoor use . Insula Electric offers a wide range of medium and low voltage distribution solutions, including junction boxes, compact enclosures, cubicles, control desks, outdoor enclosures, and rack systems. They also provide maintenance, automation, and SCADA integration services, making them suitable for industrial and large-scale projects . Ilvief has extensive experience in power distribution, industrial automation, and electrical installations, providing high-quality products and services for large-scale projects since 1979 . Electrotrust SA acts as a distributor of electromechanical and electrical components, offering access to a wide variety of high-quality electrical products from international manufacturers, which can include distribution boxes and related enclosures .

Applications and Product Types

- o Low Voltage Distribution Boxes: Residential, commercial, and small industrial installations.
 - o Medium Voltage Substations and Cabinets: Industrial plants, renewable energy projects, and utility networks.
 - o High Voltage Substations: Large-scale energy projects, including air-insulated and GIS substations.
 - o Smart Meter and Electronic Instrument Enclosures: Modern energy monitoring and automation systems.
- These Greek brands provide a combination of manufacturing, distribution, and technical support, ensuring compliance with international standards and suitability for diverse electrical distribution needs .
