

Haiti wholesale price 24-core figure-eight optical cable

Article Overview

Wholesale 24-core figure-eight optical fiber cables in Haiti are available starting around \$284 per unit, designed for self-supporting aerial installations with high mechanical and environmental durability.

Cable Overview

A 24-core figure-eight optical cable is named for its distinctive figure-8 cross-section, which integrates a messenger wire for self-supporting aerial deployment. These cables are engineered for outdoor telecommunications, enterprise networks, and infrastructure projects, supporting high-capacity data transmission. They are suitable for both single-mode (9um core) and multi-mode (50um or 62.5um core) applications, allowing flexibility for long-haul or short-range high-speed links . Key features include:

- o Self-supporting aerial design with stranded steel wires for tensile strength and easy installation .
- o Water-blocking system and PE outer sheath for moisture resistance and environmental protection .
- o Corrugated steel or aluminum armor for crush and rodent protection .
- o Temperature tolerance from -40° to +70°, suitable for harsh outdoor conditions .
- o Low dispersion and attenuation, ensuring high signal integrity over long distances .

Wholesale Pricing

- o The GYFTC8Y53 24-core figure-eight cable is available at approximately \$284.27 per unit for bulk orders starting from 1 unit .
- o Suppliers typically offer custom lengths, wooden drum packaging (1-4 km per drum), and small order flexibility for new projects .
- o Delivery times are generally 3-5 working days, with warranties up to 25 years for fiber performance .

Purchasing Considerations

- o Ensure proper tensioning and sag when installing aerially to prevent fiber strain .
- o Verify single-mode or multi-mode specifications depending on your network requirements.
- o Check for local import regulations and shipping costs to Haiti, as these can affect the final wholesale price.
- o Some suppliers provide custom branding or logos for large-scale projects . These cables are widely used for self-supporting outdoor aerial fiber networks, offering durability, ease of installation, and high bandwidth capacity, making them suitable for telecom and enterprise infrastructure in Haiti.
