

High-density ODM Modular Data Center in CÃ´te d'Ivoire

Preview

In just six months, BTS has achieved what usually takes 18 months: building and deploying a modular, cloud-enabled data center in Cote d'Ivoire's VITIB innovation zone. More than an infrastructure coup, it's a disruptive strategy at a time when hyperscalers double down on South Africa. How are we. This report is part of a series of market briefs developed by Xalam Analytics at the behest of Digital Investment Facility (DIF) under the Data Governance in Africa Initiative, on the data center market opportunity in sub-Saharan Africa ("SSA"). This analysis aims to provide key insights into. Raxio CIV1 is the country's first carrier-neutral Tier III data centre facility and will support the country and the wider region by enabling digital transformation and bridging international and local connectivity. Cote d'Ivoire is the fastest growing economy in francophone West Africa and will. Construction began in May on Cote d'Ivoire's "Digital City," an innovative digital hub designed to expand connectivity, modernize government services, and accelerate the country's digital transformation. It was the setting, on Thursday 2 October 2025, for the inauguration of the first data centre of the pan-African group ST Digital in Cote d'Ivoire, a Tier III. Pan-African cloud service provider ST Digital has begun construction on a data center at the VITIB technology park in Grand-Bassam, Cote d'Ivoire (also known as the Ivory Coast). The data center, built to Tier III standards, will span 4,000 sqm (43,055 sq ft) and offer various services, including.
