

High-transparency fiberglass tail

Preview

High-clarity fiberglass with excellent optical transparency, closely resembling glass while offering superior impact resistance. Features a non-reflective, diffused surface that softens transmitted light and reduces glare while maintaining partial transparency. Transparent fiberglass represents a revolutionary advancement in composite materials, combining the exceptional strength of traditional fiberglass with remarkable optical clarity. This innovative material consists of glass fibers embedded within a clear polymer matrix, creating a unique combination. Waterproof LED trailer tail lights function as stop, turn, and tail signal lights when properly mounted. Durable polycarbonate housing and lens. Features: Oval LED trailer tail lights serves 3 functions when properly mounted Brake light Tail Light Turn Signal. Glass fiber has become one of the ideal reinforcement materials for transparent sheets due to its excellent mechanical properties and chemical stability.
