HV power distribution units (HV PDU) are ideal for a wide range of applications in electric mobility. What is a high voltage box? The High Voltage Power Box combines the functionality of an Onboard Charger (OBC), a DC/DC converter and a PDU (Power Distribution Unit). It converts the energy from the network grid AC (Alternative Current). To support these demands, HUBER+SUHNER delivers innovative modular distribution boxes engineered to adapt to the changing requirements of modern vehicle architectures. HUBER+SUHNER's modular High Voltage Distribution Unit (mHVDU 800) can be tailored to customer specifications with a short lead.
