

How are fiber optic cable markers represented in CAD

Preview

A cable marker carries a component tag value, like any parent/child device combination. It also carries a conductor color value, carried on the RATING1 attribute on the marker block symbol. The parent symbol can carry catalog part number information. I'm wanting to create documentation for a control fiber optic network. Can anyone help me out? Some examples of a diagram would also help. 10-27-2018 01:41 AM Do you know if there's some symbol standard. Computer-aided design (CAD) has become an essential tool in designing and deploying fiber optic networks. From planning underground cable routes to visualizing complex infrastructure layouts, CAD drawing services help engineers, designers, and fiber technicians create precise and scalable network. A cable marker is a symbol that indicates the wire it is on is part of a cable. 83 KB)BIM, CAD, Visio and PDF Files for Copper & Fiber Optic Cabling, Racks & Cabinets Be among the first to receive important product updates, insights and news.
