

How much does European molded cable tray cost

Article Overview

Molded cable trays in the EU typically range from EUR20 to EUR80 per meter, depending on material, size, and design.

Price Overview

The cost of molded cable trays in Europe varies widely based on several factors:

- o **Material:** Plastic or halogen-free molded trays are generally less expensive (EUR20-EUR40 per meter), while fiberglass (FRP/GRP) or stainless steel trays can cost EUR50-EUR80 per meter due to higher durability and corrosion resistance .
- o **Size and Load Capacity:** Wider or deeper trays designed to carry heavy power cables or high-density installations are more expensive. Cable ladders for heavy-duty applications can exceed standard tray prices .
- o **Design Features:** Trays with integrated ends or unique shapes that increase capacity and ease of assembly may command a premium, sometimes up to 50% higher than standard trays .
- o **Standards Compliance:** Products meeting DIN EN 61537 or equivalent IEC standards, suitable for industrial, marine, or offshore use, may be priced higher due to certification and quality assurance .

Purchasing Options

- o **Direct Supplier Quotes:** Many EU suppliers, such as Eurostrut, Oglaend System, Trayco, and Eurotray, offer online catalogs and request-a-quote options for precise pricing .
- o **Bulk Orders:** Prices per meter often decrease with larger orders, especially for industrial projects or construction sites.
- o **Accessories and Fittings:** Additional costs may apply for brackets, connectors, and suspension systems required for installation .

Summary

For budgeting purposes, expect molded cable trays in the EU to cost roughly EUR20-EUR80 per meter, with higher-end options for stainless steel, fiberglass, or specialized designs. To obtain exact pricing, it is recommended to request quotes from suppliers, specifying material, dimensions, and load requirements. This ensures compliance with project standards and optimal cost-efficiency.
