

# How much does a low-loss MTP connector from the Philippines cost

## Article Overview

Low-loss MTP connectors typically cost between \$6 and \$12 per connector at the factory level, with retail prices in the Philippines likely higher due to shipping, import duties, and distributor markups.

## Pricing Overview

Low-loss MTP connectors, such as the US Conec Elite version, are premium multi-fiber connectors engineered for minimal insertion loss (typically  $\leq 0.35$  dB) and high durability. Factory costs for these connectors are around \$6.35 per unit, compared to generic MPO connectors at \$1.43. Retail prices in the Philippines are generally higher due to shipping, taxes, and distributor margins, so you can expect prices ranging from \$10 to \$20 per connector depending on the supplier and order volume.

## Factors Affecting Cost

- o Connector Type: MTP Elite low-loss connectors are more expensive than standard MPO connectors because of features like floating ferrules and elliptical guide pins that reduce signal degradation.
- o Fiber Count: Connectors come in MTP12, MTP24, or higher configurations. Higher fiber counts slightly increase the cost.
- o Singlemode vs Multimode: Singlemode OS2 connectors are generally more expensive than multimode OM3/OM4 due to tighter tolerances and higher performance requirements.
- o Cables vs Connectors Only: Pre-assembled trunk or fanout cables with MTP connectors cost more than standalone connectors because of labor and testing.
- o Local Availability: Importing from international suppliers like Alibaba or Sumitomo Electric may add shipping and customs fees, affecting the final price in the Philippines.

## Purchasing Options

- o Local Distributors: Companies like Codecom offer low-loss MTP connectors and can provide quotes for immediate supply.
- o International Suppliers: Platforms like Alibaba or ShopFiber24 ship globally, including the Philippines, and offer both single connectors and pre-assembled cables.
- o Bulk Orders: Ordering in larger quantities can reduce the per-unit cost, especially for factory-direct or wholesale purchases.

## Recommendation

For high-performance networks (e.g., 400G/800G, data centers, or frequent patching), investing in low-loss MTP Elite connectors is recommended despite the higher cost, as they ensure minimal signal loss and protect
