

# How much does a reel of Huijue optical cable cost

## Article Overview

A reel of Huijue optical cable typically costs between \$0.05 and \$1.50 per meter, depending on type, fiber count, and construction.

## Estimated Pricing

The cost of a fiber optic cable reel depends on several factors:

- o Cable Type: Single-mode outdoor cables generally range from \$0.10 to \$0.50 per meter, while multimode cables (OM1/OM2/OM3) range from \$0.10 to \$0.60 per meter. Armored or aerial cables can cost \$0.30 to \$1.50 per meter .
- o Fiber Count: A 2-core cable is much cheaper than a 24-core or 96-core cable. Higher fiber counts increase material and production costs .
- o Construction and Jacket: Armored cables or those with UV-resistant jackets for outdoor use are more expensive than indoor PVC or LSZH jackets . For example, a 1,000-meter reel of single-mode outdoor cable could cost approximately \$100 to \$500, while a 1,000-meter armored multi-mode cable could range from \$300 to \$1,500, depending on specifications .

## Additional Considerations

- o Bulk Orders: Purchasing multiple reels often reduces the per-meter cost.
- o Vendor and Region: Prices vary by supplier and location; international shipping or import fees may apply.
- o Installation Costs: If the reel is part of a project, labor, trenching, and termination costs can significantly increase the total expenditure .

## Where to Buy

Huijue optical cables can be sourced from specialized distributors or online wholesale suppliers. Many vendors offer custom reel lengths and cable types, so contacting suppliers directly for a quote is recommended . In summary, while the exact price of a Huijue optical cable reel depends on specifications, expect a range of \$0.05-\$1.50 per meter, with higher-end armored or outdoor cables costing more.
