

How much does a roll of optical cable cost

Article Overview

A 1,000-foot roll of fiber optic cable typically costs between \$90 and \$6,000 depending on fiber type, strand count, and construction.

Price Range by Cable Type

- o Single-mode fiber (OS2): \$0.09 to \$1.52 per foot for bulk purchases, making a 1,000-foot roll roughly \$90 to \$1,520 .
- o Multimode fiber (OM3/OM4): \$1.50 to \$6.00 per foot, so a 1,000-foot roll can cost \$1,500 to \$6,000 .
- o Low-cost bulk options: Some suppliers offer raw single-mode duplex cable for around \$0.10-\$0.50 per foot, which translates to \$100-\$500 per 1,000-foot spool .

Factors Affecting Cost

- o Fiber Strand Count: Higher strand counts increase price. For example, a 12-strand cable may cost \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot .
- o Cable Construction: Armored or outdoor-rated cables are more expensive than indoor riser-rated cables. Armored cables can range from \$0.50 to \$5 per foot .
- o Installation Considerations: Prices above are for materials only. Including installation, trenching, splicing, and connectors can raise total costs significantly, sometimes exceeding \$3 per foot for indoor runs or \$11,000-\$14,500 for premium outdoor projects .
- o Pre-Terminated vs Raw Cable: Pre-terminated cables cost 20-30% more but reduce labor costs during installation .

Practical Example

- o Indoor 1,000-foot single-mode run: Cable \$0.40/ft, labor \$1.00/ft, permits \$150, accessories \$100 -> Total ? \$2,650-\$3,100 .
- o Outdoor 2,000-foot run with conduit: Cable \$0.70/ft, labor \$1.60/ft, permits \$350, delivery \$120, accessories \$250 -> Total ? \$4,940-\$6,120 . In summary, the cost of a whole roll of optical cable varies widely based on fiber type, strand count, cable construction, and whether installation is included, with raw 1,000-foot rolls ranging from \$90 to \$6,000 and fully installed runs costing several thousand dollars more.
