

How much does a weak-elevator type cable tray cost in Madagascar

Article Overview

Weak-elevator type cable trays in Madagascar typically range from \$50 to \$150 per meter, depending on material, size, and supplier.

Overview

Weak-elevator type cable trays are commonly made from aluminum alloy, offering a modular, open design suitable for indoor cable management in machine rooms or elevator shafts. They are valued for their aesthetic finish, good load-bearing capacity (up to 300 kg per meter), and flexible installation. Standard lengths are around 3 meters, with widths ranging from 200 mm to 1000 mm.

Factors Affecting Price

- o Material Quality: High-grade aluminum alloy with surface oxidation treatment increases durability and cost.
- o Dimensions: Wider or longer trays require more material, raising the price.
- o Load Capacity: Trays designed for heavier loads or double-layer installation are more expensive.
- o Supplier and Shipping: Importing from international suppliers may add shipping and customs fees, while local manufacturers in Madagascar may offer competitive pricing but limited specifications.

Estimated Price Range

- o Small to medium trays (200-400 mm width): \$50-\$80 per meter
 - o Medium to large trays (400-600 mm width): \$80-\$120 per meter
 - o Large trays (600-1000 mm width or high load capacity): \$120-\$150 per meter
- These prices are indicative and may vary depending on local availability, bulk orders, and supplier negotiations.

How to Obtain Local Pricing

- o Contact local cable tray manufacturers and suppliers in Madagascar such as Jeetmull Jaichandlall, Cable House, Micro Sheet Crafts, or Brilltech Engineers.
- o Provide specifications including length, width, load capacity, and material type to get accurate quotes.
- o Consider bulk orders or long-term supply agreements to reduce per-meter costs. By reaching out to local suppliers with detailed specifications, you can obtain precise pricing and ensure compliance with local standards and installation requirements.

Cable Tray Cable trays are mechanical support systems that provide a rigid structural system for electrical
