

How to convert broadband fiber optic cable to a switch

Preview

Connecting a fiber optic cable and a copper cable to a media converter can be done in the following ways: Connect Switch B's copper connection to the fiber media converter's RJ45 port with a UTP cable. In most cases, fiber optic media converters convert between copper and fiber optic cables. Ethernet ports are designed for copper cables (like Cat5e or Cat6), which transmit data using electrical signals. This allows networks to extend beyond the 100 m copper limit while gaining higher bandwidth and resistance to electromagnetic interference.

Media Converters: In some cases, you may need a media converter to connect fiber optic cables to switches that do not have SFP

Terminate your fiber optic cabling with two LC-style connectors or purchase a pre-terminated fiber optic cable with two LC-style

Buy fiber network switches to extend ethernet network over fiber. Order Versitron high speed fiber optic network switches for fiber
