

How to fix blurry crosshairs on a beam splitter

Preview

Focus the crosshairs first against a pure white background or the blue sky by rotating the Ocular lens and lock it down. Parallax should be adjusted using the objective adjustment at the desired yardage. The most common causes of a blurry rifle scope include incorrect diopter settings, parallax adjustment issues, improper eye relief, environmental factors like mirage, and optical quality problems. Only a small percentage of blurry scopes are actually. However, depending on the orientation of my wedge beamsplitter, (but always with the beamsplitter coating facing the part) I either get (sorry for the crappy drawing) a) Sharp image, no change in ghosting b) Ghost image eliminated but image is now blur What gives? Is this common? And how do I make. If your system is like mine, just under the min specs for the game, you've probably had issues with some graphics blurring out, including of all things, the SCOPE MARKINGS. A Toothpick - Most people have some of these laying around somewhere in the kitchen. Was this due to too much power at short range (don't think so cause I shot the same rifle with a 6x24 power scope and was just trying out a different scope) or maybe was it the sun cause I was shooting into the sun kinda.
