

Article Overview

Huijue electrical cable trays typically range from \$2 to \$25 per meter, depending on material, type, and finish, with bulk orders potentially reducing costs.

Price Range and Factors

The cost of Huijue cable trays varies widely based on material, design, and surface treatment. For example, galvanized steel trays are common and moderately priced, stainless steel trays are more expensive due to corrosion resistance, aluminum trays are lightweight but pricier, and plastic trays are budget-friendly but not suitable for heavy loads (ApexTray) . Ladder-type trays generally cost more than perforated or wire mesh trays due to their higher load capacity . Composite Huijue trays, which combine materials for durability and corrosion resistance, are available for bulk purchase, but prices are typically quoted per order rather than listed publicly (Go4WorldBusiness) . Accessories and fittings are priced per piece and can add to the overall cost (TheProjectEstimate) .

How to Obtain Exact Pricing

Since Huijue trays are often sold through wholesalers or OEM suppliers, the most accurate way to determine cost is to request a quote directly from verified suppliers. Platforms like Made-in-China and Europages list multiple Huijue suppliers who can provide tailored pricing based on quantity, tray type, and customization needs .

Tips for Cost Management

- o Bulk orders can significantly reduce per-meter costs.
- o Material choice affects both upfront cost and long-term durability.
- o Tray type (ladder, perforated, wire mesh) impacts price and suitability for your project.
- o Surface finish (HDG, powder coating, pre-galvanized) influences corrosion resistance and cost. For a precise quote, it is recommended to contact Huijue distributors or verified importers with your project specifications, including tray length, type, and quantity.
