

Jp Integrated Distribution Box Electricity Meter

Preview

The JP-series outdoor integrated distribution box is a comprehensive outdoor power distribution device that integrates multiple functions, including metering, outgoing circuits, and reactive power compensation. It has local short-circuit, overload, overvoltage, leakage and other protection functions.

JP series outdoor integrated power distribution box is an outdoor integrated power distribution device integrating metering, outgoing line, reactive power

JP outdoor integrated distribution box is a metering, line, reactive power compensation and other functions in one to reach the outdoor integrated distribution device, with short circuit, overload,

It is widely used in urban and rural power grids, industrial power systems, and public infrastructure, featuring compact structure, easy installation, and high safety.

JP series outdoor integrated power distribution boxes are comprehensive power distribution devices with the functions of metering, outgoing and reactive power compensation. It has the functions of short

The JP series outdoor integrated distribution box is a multifunctional device that combines metering, outgoing lines, and reactive power compensation in one compact unit.
