

Laser diode ldpd

Preview

We have compiled a list of Laser Diodes from the LD-PD Inc website/catalog and made their products searchable by specification. Use the filters to narrow down on products based on your requirements. Renowned for its proficiency in designing and manufacturing high-power, high-reliability laser diodes, LD-PD is a trusted name in the industry. Low power driver LPD 5-25 is a linear current source with excellent properties for driving low power laser diodes. Current waveforms can be CW, pulsed, modulated or a combination with frequencies up to 50 kHz (square wave) and currents up to 5 A. An analog modulation input and a digital enable /. LD-PD manufacturer of photodiode, DBR/DFB SLD FP laser diodes (400- 2000 nm) in the world and our technology IP is protected with 30+ patents and 10+ years of expertly tuning our manufacturing processes.

All the following functions can be accessed through supporting software, it is suggested that after setting up with supporting LDPD software and obtaining the

LD-PD INC, founded in 2004, has established itself as a premier provider of cost-effective photo detectors, laser diodes, and related driving products. Renowned for its proficiency in designing and

The Laser Diode Constant Current Driver (LDCCD) is a board level constant current laser diode driver with fast settling, overshoot free analog PID control, ideal for driving high power multimode pump

LD-PD's compact Laser Diode Driver is a compact all-in-one unit designed for convenience of use, and combines a user interchangeable mount for a laser

LD-PD PTE. LTD. is the product of optoelectronic laboratories, such as optical fiber, laser, photoelectron, optical machinery, optical instrument and optical fiber communication, and the main

The semiconductor laser developed by LD-PD is currently operating for 7X24 hours in different application areas of its partners. Advanced semiconductor technology combined with our unique

LD-PD INC is a national high-tech and integrated circuit design enterprise. LD-PD is a manufacturer of DBR/DFB/ECL/SLD/FP laser diodes and our technology IP is protected with 30+ patents and 10+

PL-DFB-935-B-A81-PA - Laser Diode from LD-PD Inc. Get product specifications, Download the Datasheet, Request a Quote and get pricing for PL-DFB-935-B-A81-PA on GoPhotonics

LD-PD PTE LTD'S Nanosecond Laser Diode Modules with Laser pulses as short as 30 ps and widely tunable

in nanosecond range and we have some specific wavelengths Peak power of more than 2

Pulsed Laser Diode Modules The pulsed laser diode driver is directly integrated into the modules. **Conversion Screens** Our conversion screens make your laser visible in the range from 250-600 nm,

C+L Band DWDM High power DFB (Distributed feedback type) semiconductor laser is a 14PIN butterfly package, with built-in TEC, lens, thermistor and PD integrated in the 14PIN butterfly package. The

Home Product List Laser diode RF Module 10~20 GHz 1310/1550 nm High-Speed 20 GHz+ directly-modulated lasers

This narrow linewidth DFB laser module from LD-PD INC has excellent performance and excellent reliability (compliant with Telcordia GR-486 specification). Up to 100mW output power, very low

The module has three maximum current drive ranges, suitable for lasers of different power sizes (selected by circuit board jumpers). The built-in reference source has extremely low noise levels and

Low power driver LPD 5-25 is a linear current source with excellent properties for driving low power laser diodes. Current waveforms can be CW, pulsed, modulated or a combination with frequencies up to

LD-PD Inc - PL-DFB-0780-A-A81-PA Laser Diode from LD-PD Inc Description: 779.5 nm Tunable DFB Laser Diode for Absorption Spectroscopy Applications
