

Length of optical cable line in CÃ'te d'Ivoire

Preview

Cote d'Ivoire plans to activate 5,207 kilometers of fiber optic cable in the coming months, part of a total 7,000 km to be deployed nationwide by 2025, according to Ibrahim Kalil Konate, Minister of Digital Transition and Digitization. This robust growth is fueling digital transformation strategies across African nations, with Cote d'Ivoire emerging as a frontrunner in spearheading the digital shift. Under the leadership of its CEO, Kolo Kone, the company is building robust and. The state of theoretical coverage of the country's localities by telecommunications networks, as reported by operators in 2023, is as follows: Distribution by operator of the number of declared covered and uncovered localities as of 30/06/2023 Total number of localities: 8,518 Distribution by. Cote d'Ivoire has been building its 7,000 km long national optical fiber network since 2012. Nearly 5,000 km have already been deployed. The Kaydan group wants to partake in the country's digital transformation. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country.
