

Low-loss solution for Swiss energy management systems

Preview

At a time when countries around the world are threatened with energy shortages, ETH Zurich and NCCR Automation researchers have developed a high-impact, low-cost software solution to improve resilience and efficiency. We provide world-class solutions across Switzerland - giving businesses the tools they need to save energy and make their buildings truly smart. It's our job to make your business' energy. In April 2026, GSL ENERGY deployed an 80kW / 209kWh air-cooled BESS in a Swiss farm. System. In the face of climate change, resource scarcity and the need to reduce energy costs and increase plant availability, Total Energy Monitoring offers flexible solutions that can be customized to any company.

OpenEMS stands for „Our open-source energy management system helps users manage energy intelligently by making complexity transparent and manageable, and providing future

The digital transformation of the energy sector and decarbonization in the building sector are advancing rapidly, and the market for energy management systems (EMS) is growing accordingly. EMS enable

At a time when countries around the world are threatened with energy shortages, ETH Zurich and NCCR Automation researchers have developed a high-impact, low-cost software solution

TechTarget provides purchase intent insight-powered solutions to identify, influence, and engage active buyers in the tech market.

With its hydroelectric power plants in the Alps and innovative battery projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity.

The system includes hardware for measuring and monitoring systems as well as software. Our energy management solutions support ISO 50001 and ISO 50006 as well as EMAS certification and make it

This project in Switzerland shows GSL ENERGY can deliver reliable farm energy storage systems in hard environments. The system uses an air-cooled BESS and heating technology, so it

Private sector credit growth plummets to historic low Govt to roll out new dev strategy targeting \$1.0t economy by 2034 Cenbank buys \$85m to keep

hermal energy and the thermal energy of the River Lorze. A highly digitalised energy management system ensures optimal use and efficient consumption of Papieri's energy. Everything has been

Low-loss solution for Swiss energy management systems

Synthesize links between technical and organizational aspects of energy optimization. Decentralized renewable energy systems (DRES) integrate renewable energy sources with energy

Critical review of microgrid energy management system models and solution methods. Renewable energy resources are currently being deployed on a large scale to meet the requirements

As sustainability becomes a top priority for industries globally, modular LV systems are crucial in optimizing energy management, reducing

The EMS Market Overview, supported by the Swiss Federal Office of Energy through the EnergieSchweiz program, is a powerful tool for finding the right EMS. Included is a wide range of

Gartner's strategic advice, trusted insights and practical tools helps IT leaders identify opportunities for innovation and tackle their mission-critical priorities.

EcoSolve.Energy Ltd. We provide world-class solutions across Switzerland - giving businesses the tools they need to save energy and make their buildings truly smart.

Here we apply a well-established techno-economic energy systems model and highlight the challenges of the Swiss energy transition under different technical, socio-economic, and geopolitical contexts.
