

Manufacturer of flame-retardant cold aisle display cabinets

Article Overview

Leading manufacturers of flame-retardant cold aisle display cabinets include Nucor Data Systems, EAE Electric, Panduit, and Vertiv, offering modular, fire-rated, and customizable solutions for data centers.

Key Manufacturers and Offerings

Nucor Data Systems (NDS) provides the ADVANCED AISLE(TM) Containment System, which is modular and customizable for both retrofit and new data center builds. Their solutions include sliding or swinging doors, optional self-closing mechanisms, and can accommodate aisle widths from 36" to 96" with fire-retardant materials available upon request . EAE Electric offers the KabinPLUS Aisle Containment Solutions, featuring cold aisle cabinets with single or double sliding doors and sliding roof frame units fabricated from aluminum and polycarbonate panels. These cabinets include fire nozzle entry sections and flexible plastic isolation elements, ensuring both flame resistance and adaptable airflow management . Panduit provides adjustable vertical wall containment systems and dual sliding doors for cold aisle management. Their solutions focus on energy efficiency, temperature control, and secure access while supporting fire safety through robust structural designs . Vertiv manufactures freestanding, rack-independent aisle containment systems compatible with various cabinet heights and types. Their cold aisle containment solutions integrate with existing fire suppression systems, using thermal drop-out panels to maintain fire safety while optimizing airflow and energy efficiency .

Features to Consider

- o Fire-Retardant Materials: Polycarbonate panels and aluminum frames designed to resist flames and maintain safety standards.
- o Modular Design: Adjustable heights and widths to fit existing or new racks.
- o Cooling Integration: Supports traditional CRAC units and hybrid liquid cooling systems.
- o Access and Security: Sliding doors, roof frames, and seismic stands for flexible installation and secure access.
- o Energy Efficiency: Designed to optimize airflow separation and reduce PUE (Power Usage Effectiveness). These manufacturers provide comprehensive solutions for data centers seeking flame-retardant, modular, and scalable cold aisle containment systems, ensuring both safety and operational efficiency.

Modular sliding or swinging door versions available with optional "soft" self-closing mechanisms and hold-open provisions.
