

Article Overview

12-core fiber optic distribution boxes in Mexico offer IP65 protection, indoor/outdoor use, and a warranty of up to 2 years for the enclosure and 1 year for fiber components.

Product Overview

A 12-core fiber optic connection box is designed to terminate and manage up to 12 fiber optic cables, supporting FTTH, FTTx, CATV, and data communication networks . These boxes typically include:

- o 12 SC adapters for fiber connections
- o Splice trays for up to 12 fusions
- o Integrated cable management with bend radius protection
- o Lockable doors for security
- o IP65 rating for outdoor and indoor installation

Features and Specifications

- o Material: Robust ABS or impact-resistant plastic
- o Cable Entry/Exit: Supports 1-2 incoming cables (max diameter 15mm) and up to 12 drop cables
- o Splitter Accommodation: Some models support 1:8 optical splitters
- o Accessories: Heat-shrink splice protectors, transit tubing, wall fixings, tie wraps, labeling paper, and self-adhesive positioning blocks
- o Operating Conditions: Temperature range -40° to 60°, humidity up to 93% at 40°, air pressure 62-101 kPa

Installation and Use

- o Mounting Options: Wall-mounted or pole-mounted
- o Applications: Ideal for FTTH access networks, local area networks, and telecommunication networks
- o Maintenance: Removable splice trays and doors allow easy installation and fiber management

Warranty and Support

- o Warranty: Typically 2 years for the enclosure and 1 year for fiber optic components
 - o Coverage: Replacement is provided for non-human damage during the warranty period
 - o Additional Services: Some suppliers offer free samples for quality testing and support for prompt delivery
- These 12-core boxes are widely available in Mexico through distributors and online suppliers, providing a cost-effective and secure solution for fiber optic network deployment .

Mexico Warranty Connection Box 12 Cores
