Namibia and Angola have signed agreements to develop a N\$941 million cross-border power interconnector, scheduled for completion in 2029, aimed at improving electricity supply and regional integration across Southern Africa. nable, inclusive, and clean energy. This National Energy Compact (hereafter referred to as the 'Compact') serves as a strategic framework to accelerate progress towards achieving universal energy access by 2040, reflecting Namibia's dedication to sustain electricity access to 59. However. Namibia has immense potential for renewable energy development, with some of the best solar and wind resources globally. However, the country still relies heavily on electricity imports, producing only 30% of its own electricity needs. The Act has subsequently been repealed by the Electricity Act, 4 of. On 25 February, I had the distinct honour of meeting with Her Excellency Dr. The agreements, signed in Luanda, include a Joint Development Agreement. President Netumbo Nandi-Ndaitwah says Namibia's energy sector is closely linked to the Sixth National Development Plan (NDP6). The NDP6 focuses on economic diversification, value addition, job creation and sustainable management of resources.
