

Article Overview

A 12U network rack with 600mm width can accommodate equipment in depths of 350mm, 550mm, or 600mm, with weight capacities typically ranging from 84 to 132 lbs depending on the model.

Rack Dimensions and Depth Options

- o Width: Standard 600mm (suitable for 19-inch rack-mounted equipment)
- o Depths: Common options include 350mm, 550mm, and 600mm. The 350mm depth is suitable for compact equipment, while 550mm and 600mm depths provide more space for cabling and larger devices .
- o Height: 12U, which corresponds to approximately 21 inches of vertical rack space.

Weight Capacity

- o Lightweight models (e.g., UniFi 12U wall rack) support around 84 lbs (38 kg) .
- o Heavier-duty models (e.g., ECHOGEAR 12U wall mount) can support up to 132 lbs (60 kg) .
- o Weight capacity depends on construction materials, such as SPCC steel thickness (1.2-2 mm) and reinforced mounting angles .

Features and Considerations

- o Wall-mounted vs. freestanding: Most 12U racks in this size range are wall-mounted, saving floor space.
- o Cooling: Many models include pre-mounted fans or vented panels to maintain airflow and prevent overheating .
- o Access: Removable side panels and lockable front doors allow easy installation and security.
- o Shelving: Optional 1U or 2U shelves can be added for non-rack-mountable equipment .
- o Compliance: Many racks meet EU and UK RoHS and REACH standards for safety and environmental compliance .

Choosing the Right Depth

- o 350mm depth: Best for small switches, patch panels, or AV equipment with minimal cabling.
- o 550mm depth: Offers a balance between compact size and cable management space .
- o 600mm depth: Ideal for larger servers, UPS units, or equipment requiring more rear clearance . Selecting the appropriate 12U rack depends on your equipment depth, weight, and airflow requirements. For most standard networking setups, a 600mm wide by 550mm or 600mm deep wall-mounted rack provides sufficient space and flexibility for future expansion.

Network rack capacity 12u 600 550 350

This cabinet features an internal height of 12U, enabling you to install an entire business network setup with up to 12 x 1U
