Suitable for small loads to heavy industrial power distribution. Offers strong breaking capacity up to 50kA/70kA, ensuring system reliability during faults. Thermal and magnetic trip settings for adaptable protection based on electrical requirements. Besides, it can also provide protection of overload, short circuit and under voltage for the non frequent. LV moulded case circuit breaker with intelligent release (S) The NMI & NXM Series MCCBs (Moulded Case Circuit Breakers) are advanced protection devices designed for reliable overload, short-circuit, and under-voltage protection in commercial, industrial, and residential electrical systems. These breakers ensure high performance, safety, and durability under. P- 003 Moulded Case Circuit Breakers Overview The moulded case circuit breaker will provide protection for the circuit and equipment in case of overload, short circuit and under voltage condition occurred in the power distribution circuit.

The NXM Moulded Case Circuit Breaker (MCCB) offers reliable protection against overload, short-circuit, and under-voltage in low-voltage power distribution systems.

NX Lighting Controls networked platform delivers a seamless lighting control solution. NX is capable of scaling from standalone fixture and room control applications to networked enterprise deployments.
