Industry expansion from 2025 to 2035 will be accelerated by quantum photonics, AI-optimized optical switching, and terabit-scale networks. Since the report's last publication in January 2025, and the webinar Optical Circuit Switching for AI Scaling and Datacenter Automation in July 2025, the OCS forecast has been updated based on newer information. The global optical switches market was valued at USD 7. The market is expected to grow from USD 8.5 billion in 2025, at a CAGR of 12. The market is driven by the growing need for high-bandwidth, energy-efficient data center networks to support increasing AI and. The report "Optical Circuit Switches Market by Switching Technology (MEMS, Liquid Crystal, Silicon Photonics), Port Configuration (Low Port, Medium Port, High Port), and Application (Intra Data Centers, Telecommunications Networks) - Global Forecast to 2032", The global optical circuit switches. Optical switches are critical components in modern fiber optic networks, enabling dynamic routing, signal protection, and network reconfiguration without manual intervention.
