

Article Overview

Polish manufacturers offer a wide range of fireproof cable trays, including E-30 and E-90 rated systems, halogen-free trays, and specialized solutions for industrial, rail, and infrastructure applications.

Key Manufacturers and Product Varieties

BAKS is a leading Polish manufacturer with over 40 years of experience, offering professional cable route systems including wire mesh, long-span trays, and ladder trays. Their products are certified for E-30 and E-90 fire ratings, ensuring uninterrupted electrical function during fires. BAKS provides advanced online tools for load simulation, cable filling, and project cost estimation, along with Revit model databases for design efficiency. DACPOL supplies a variety of cable trays, including halogen-free Noryl trays, IBOCO trays, and BETADUCT PVC trays. Halogen-free trays produce minimal smoke and are suitable for high-safety environments such as tunnels and metro systems. DACPOL trays are available in full tray configurations and are used in rail, automotive, offshore, mining, and energy sectors. Carboline Polska specializes in passive fire protection products, including fireproof collars, pastes, foams, and grilles. While not exclusively cable trays, their products complement fireproof installations by protecting service penetrations and expansion joints, enhancing overall fire safety in electrical installations. Other Polish suppliers and manufacturers include SIPRIX Sp. z o.o., INTECKER Sp. z o.o., and EL-PUK, which provide metal and PVC cable trays suitable for industrial and commercial applications, often with fire-resistant properties.

Product Features and Applications

- o Fire Ratings: E-30 and E-90 certified trays for 30 to 90 minutes of fire resistance.
- o Materials: Steel, aluminum, PVC, and halogen-free polymers.
- o Configurations: Ladder trays, wire mesh trays, long-span trays, and full trays.
- o Special Applications: Railways, metro systems, offshore platforms, mining, and energy production.
- o Safety and Compliance: Halogen-free options reduce smoke and toxic gas emissions during fires, meeting strict international standards. Polish manufacturers provide both standard and customized solutions, ensuring compatibility with complex installations and high safety requirements. These systems are widely used in industrial, transportation, and infrastructure projects where fire safety and uninterrupted electrical operation are critical.
