

Price list for multi-layer cable trays

Article Overview

Multi-layer cable trays typically range from \$5 to \$50 per meter depending on material, size, and design.

Pricing Overview

The cost of multi-layer cable trays varies significantly based on material, dimensions, type, and quantity. Common materials include:

- o Steel: Strong and durable, suitable for general-purpose installations. Prices typically range from \$5 to \$25 per meter depending on thickness and finish, such as hot-dip galvanization .
- o Aluminum: Lightweight and corrosion-resistant, ideal for humid or industrial environments. Prices generally range from \$6 to \$30 per meter .
- o Fiberglass/FRP: Offers high corrosion resistance and durability, often used in chemical plants or outdoor installations. Prices range from \$10 to \$50 per meter depending on specifications .

Factors Affecting Price

- o Tray Dimensions: Wider or taller trays designed to hold more cables cost more.
- o Tray Type: Ladder, wire mesh, trough, or basket designs influence both material usage and price .
- o Quantity and Packaging: Bulk purchases often reduce per-meter cost.
- o Customization: Special coatings, perforations, or multi-layer configurations can increase cost .
- o Installation Accessories: Supports, brackets, and connectors add to the total project cost .

Installation Considerations

Installation costs vary depending on complexity, tray material, and project scale. For example, steel trays are generally easier to install in standard environments, while aluminum or FRP trays may require specialized handling. Accurate budgeting should include both tray cost per meter and installation expenses to avoid unexpected costs .

Summary

For a typical multi-layer cable tray project:

- o Steel trays: \$5-\$25 per meter
- o Aluminum trays: \$6-\$30 per meter
- o Fiberglass/FRP trays: \$10-\$50 per meter Prices fluctuate based on material, size, type, and customization, so obtaining quotes from suppliers is recommended for precise budgeting .
