

Article Overview

Metal cable trays in Germany typically cost between EUR10 and EUR50 per meter, depending on material, type, and finish.

Price Range by Material and Type

- o Galvanized Steel: The most common and cost-effective option, generally priced around EUR10-EUR30 per meter, offering durability and corrosion resistance .
- o Stainless Steel: More expensive due to higher corrosion resistance, often used in harsh or outdoor environments; prices can exceed EUR30 per meter .
- o Aluminum: Lightweight and rust-proof, typically EUR20-EUR50 per meter, suitable for installations where weight is a concern .
- o Plastic or Halogen-Free Trays: Budget-friendly alternatives, but not ideal for heavy loads or high-temperature applications .

Pricing Considerations

- o Tray Type: Ladder trays are more expensive than perforated or wire mesh trays because they support heavier cables .
- o Coatings: Hot-dip galvanization (HDG) increases durability and cost, while pre-galvanized or powder-coated finishes may be cheaper but less long-lasting .
- o Length and Fittings: Standard lengths are often 2.4 meters, with fittings priced per piece . Bulk orders can reduce the per-meter cost .
- o Additional Costs: Shipping, installation, and labor can add to the total project cost .

Summary

For a typical German metal cable tray, expect EUR10-EUR30 per meter for galvanized steel, EUR30+ for stainless steel, and EUR20-EUR50 for aluminum. Prices vary based on tray type, coating, and order quantity, and bulk purchases or direct supplier negotiations can help reduce costs .
