

Price of Gray Fiber Optic Bevel Panel

Article Overview

The price of a gray fiber optic bevel panel typically ranges from \$50 to \$200 depending on size, port count, and vendor.

Fiber optic bevel panels are used to organize and protect fiber connections in network cabinets or data centers. Prices vary based on port capacity (e.g., 12, 24, or 48 ports), connector type (LC, SC, MPO), and panel size (1U, 2U, or 10" cabinets) . For example, a 12-port LC Quad 10" gray panel is available from vendors like Reichelt, though the exact price is not listed online . Factors affecting price:

- o Port count: More ports increase cost.
- o Material and finish: Gray panels with resin-hardened or beveled edges may be slightly more expensive.
- o Brand and vendor: Established brands like CommScope or Delock may charge premium prices .
- o Additional features: Some panels include integrated splice trays or modular adapters, which can raise the price. Where to check current prices:
 - o Graybar Store: Offers a wide selection of fiber optic panels, including gray models, with online ordering .
 - o Reichelt Electronics: Lists specific 10" gray panels with LC Quad ports .
 - o RLH Industries and CommScope: Provide detailed product catalogs and pricing upon request for larger or custom orders . For an exact price, it is recommended to contact the vendor directly or check their online store, as prices fluctuate based on inventory, shipping, and regional availability.
