

Price of cable tray elbows for fire pump rooms

Article Overview

Cable tray elbows for fire pump rooms typically range from \$30 to \$150 per piece, depending on material, size, and fireproof rating.

Material and Fireproof Considerations

Cable tray elbows are available in galvanized steel, stainless steel, aluminum, FRP (fiberglass reinforced plastic), and PVC. For fire pump rooms, galvanized steel or stainless steel elbows are preferred due to their fire resistance, load-bearing capacity, and durability (). Fireproof or fire-resistant elbows are often used in conjunction with fire-rated cable trays to maintain system integrity during a fire ().

- o Galvanized Steel: Moderate corrosion resistance, suitable for indoor industrial applications. Price typically \$30-\$60 per 90-degree elbow.
- o Stainless Steel: High corrosion and fire resistance, ideal for harsh or outdoor environments. Price typically \$80-\$150 per elbow.
- o FRP/Aluminum: Lightweight, corrosion-resistant, sometimes used in high-humidity or chemical-prone areas. Price typically \$50-\$100 per elbow.

Size and Configuration

The cost also depends on the tray width and elbow angle. Standard 90-degree elbows for widths of 100-300 mm are most common. Custom sizes or heavy-duty elbows for high cable loads may increase the price ().

Procurement Tips

- o Check fire rating compliance: Ensure elbows meet DIN 4102-12 or equivalent fire standards if used in fire pump rooms ().
- o Supplier quotes: Prices vary by manufacturer and region. UK suppliers like Armorduct Systems () or international platforms like Alibaba () can provide bulk pricing.
- o Material matching: Use elbows of the same material as the main tray to avoid galvanic corrosion; dielectric unions may be needed when mixing metals (). In summary, for fire pump rooms, expect to pay \$30-\$150 per elbow, with galvanized steel being the economical choice and stainless steel offering maximum fire and corrosion protection. For exact pricing, contact suppliers with your tray width, elbow angle, and fire rating requirements.

Price of cable tray elbows for fire pump rooms

The cable tray price list are for hot dip galvanized ladder type cable tray. The price is based on standard length of the
