

Price of continuous downward bends in cable trays

Article Overview

Continuous downward bends in cable trays typically range from INR350 per piece in India to approximately \$0.8 per unit for bulk orders internationally, depending on material, size, and supplier.

Pricing Overview

- o India: Suppliers like Perrier Infinity Marketing Pvt Ltd offer cable tray bends, including downward configurations, at INR350 per piece for standard steel bends . Prices may vary based on the angle, width, and duty rating of the tray.
- o International Bulk Orders: On platforms like Alibaba, bend cable trays start at around \$0.8 per unit for bulk purchases (minimum order of 10 units), with options in stainless steel and other materials .

Material and Configuration Impact

- o Materials: Bends are available in mild steel (pre-galvanized or hot-dip galvanized), aluminum, and stainless steel (grade 316L) . Stainless steel and heavy-duty options generally cost more due to durability and corrosion resistance.
- o Angles and Sizes: Common downward bends include 45° and 90° angles, with adjustable bends available in 30°, 45°, 60°, 75°, and 90° for medium and heavy-duty trays . Wider trays and higher duty ratings increase the price.
- o Customization: Some suppliers offer custom dimensions, coatings, and finishes, which can affect the final cost .

Additional Considerations

- o Bulk Discounts: Ordering in larger quantities often reduces the per-unit cost.
- o Installation and Accessories: Additional costs may include covers, fasteners, and supports for the bends.
- o Supplier Location: Prices may vary depending on shipping, import duties, and local market conditions. In summary, for standard steel downward bends in India, expect around INR350 per piece, while bulk international orders can start at \$0.8 per unit, with prices increasing for premium materials, larger sizes, or specialized configurations .
