

## Article Overview

Horizontal bends for cable trays typically range from \$10 to \$150 per piece depending on type, material, and size.

## Overview of Horizontal Bends

Horizontal bends are essential components in cable tray systems, allowing cables to change direction smoothly without damaging the wires. They are available in various types: equal welded bends, unequal welded bends, and series bends, each suited for different installation layouts and space constraints. Materials commonly used include aluminum, stainless steel, and galvanized steel, which affect both durability and price.

## Price Ranges

- o Standard 90° horizontal bends: Prices generally range from \$10 to \$50 per piece for smaller sizes and standard materials like galvanized steel.
- o Larger or heavy-duty bends: For industrial applications or thicker materials (1.3-2.5 mm hot-dip galvanized), prices can go up to \$100-\$150 per piece.
- o Custom or non-standard bends: Prices vary depending on dimensions, angle, and material, and suppliers often provide quotes on request.

## Suppliers and Sources

- o IndiaMART and ExportersIndia list multiple suppliers in India, including Humaira Enterprises, Bajiya Industrial Corporation, and Maheshwari Electricals, who provide horizontal bends and related fittings.
- o Alibaba and Made-in-China offer international options, including perforated and hot-dip galvanized bends, with bulk order discounts and customization available.
- o Aparna Rollform provides high-quality bends compatible with ladder, perforated, and solid-bottom trays, suitable for commercial and industrial installations.

## Considerations for Side-by-Side Installation

When installing horizontal bends side by side:

- o Ensure consistent bend angles to maintain cable integrity.
- o Choose compatible materials with the main tray to prevent corrosion or mechanical stress.
- o Consider series bends for smoother transitions in tight spaces, which may slightly increase cost but reduce cable strain.

## Price of horizontal bends in cable trays

For precise pricing, it is recommended to contact suppliers directly with specifications such as material, size, and quantity, as prices fluctuate based on order volume and customization requirements .

90-Deg Horizontal E-Bend Section (cULus Classified) is a cable runway for horizontal direction change. This 90-Degree Horizontal E
