

Prices of server racks in Singapore data centers

Article Overview

Server rack prices in Singapore range from around SGD 300 for smaller used racks to over SGD 1,000 for new, fully equipped 42U racks.

Price Overview

- o Used racks: On platforms like Carousell Singapore, used server racks are available at lower prices. For example, a 22U rack can cost around SGD 300, a 27U rack about SGD 325, and a 42U rack approximately SGD 400, often including PDUs and shelves, with optional delivery for an extra fee of around SGD 80 .
- o New racks: Retailers such as Titan Pte Ltd, Datacom, and other Singapore-based suppliers offer new server racks ranging from 6U wall-mounted racks to 48U floor-standing racks. Prices for fully equipped 42U racks with accessories like PDUs, fans, and cable management can exceed SGD 1,000, depending on customization and features .

Factors Affecting Price

- o Rack Size: Standard sizes include 6U, 9U, 12U, 18U, 22U, 27U, 32U, 36U, 42U, 45U, and 48U. Larger racks generally cost more due to increased material and structural requirements .
- o Type: Floor-standing racks are more expensive than wall-mounted racks. Wall-mounted racks (6U-15U) are suitable for smaller setups, while floor-standing racks (18U-48U) are common in data centers .
- o Accessories: Inclusion of PDUs, fans, cable management arms, and security locks increases the price. Bundled accessories are often included in premium models .
- o Customization: Custom racks with special dimensions, double sections, mesh or glass doors, and enhanced ventilation can significantly increase costs .
- o Condition: Used racks are cheaper but may require inspection for wear and tear, while new racks come with warranties and manufacturer support .

Additional Considerations

- o Delivery and installation: Some suppliers include delivery to ground or lift-accessible levels for larger racks (32U-42U), which may affect total cost .
- o Local suppliers: Singapore has multiple suppliers like Datacom, Titan Pte Ltd, and server-rack.com.sg, offering competitive pricing and ready stock . In summary, small used racks start around SGD 300, while new, fully equipped 42U racks can cost over SGD 1,000, with prices influenced by size, type, accessories, and customization. Buyers should consider both upfront cost and additional services like delivery and installation when budgeting for data center infrastructure in Singapore.
