

Article Overview

Top fiberglass cable tray manufacturers include Friedrichs, Hallas Fiberglass, L-com Global Connectivity, Cablofil, Ideal Industries, Fiberglast, Eaton, B-Line Series, Legrand, and MP Husky, all known for durability, corrosion resistance, and industrial-grade performance.

Leading Manufacturers and Their Strengths

Friedrichs - Known for high-quality trays designed to withstand harsh environments, ideal for chemical processing, wastewater treatment, and oil and gas industries. They offer a variety of styles and sizes tailored to specific project needs . Hallas Fiberglass - Offers lightweight yet robust trays that meet rigorous industry standards. They provide both off-the-shelf and custom solutions, with strong customer support for residential and commercial projects . L-com Global Connectivity - Delivers high-strength trays suitable for data centers and telecommunications installations, with a focus on sustainability and a wide range of configurations . Cablofil - Specializes in innovative cable management solutions that simplify installation and maintenance while maintaining industrial durability . Ideal Industries - Combines advanced materials with comprehensive installation options, emphasizing continuous product innovation . Fiberglast - Offers easy-to-install, long-lasting trays with high customer satisfaction and extensive technical support, suitable for various applications . Eaton and B-Line Series - Provide durable, resilient trays for indoor and outdoor use, with B-Line offering customized sizes and sustainable materials . Legrand - Known for lightweight, high-strength trays that reduce installation time, ideal for commercial and industrial applications . MP Husky - Offers FRP trays with steel-equivalent load capacity, non-conductive, corrosion-resistant, and lightweight, suitable for offshore oil & gas, refineries, and laboratories. Available in polyester and vinylester resin systems with ASTM-compliant flame ratings .

Key Considerations

- o Material Benefits: Fiberglass (FRP/GRP) trays are corrosion-resistant, non-conductive, impact-resistant, and lighter than steel, making them easier to install and maintain .
- o Applications: Suitable for chemical plants, offshore platforms, water treatment facilities, and industrial environments where durability and chemical resistance are critical .
- o Customization: Many manufacturers offer custom sizes, resin types, and color options to meet specific project requirements .
- o Compliance: Look for trays meeting ASTM standards for flame resistance and structural performance . Selecting a manufacturer should consider project environment, load requirements, installation ease, and long-term durability. For industrial or harsh environments, MP Husky, Friedrichs, and Enduro (Creative Composites Group) are particularly recommended, while Fiberglast, Eaton, and Legrand are excellent for commercial and general industrial applications.
