

Specifications of UAE electrical cable trays

Preview

In the UAE and KSA, a typical steel ladder or perforated cable tray comes in standard lengths of 2,440 mm and 3,000 mm. Widths offer far more variety, usually ranging from a narrow 50 mm up to 1,200 mm. Common side depth (or height) options are 50 mm, 75 mm, 100 mm, 150 mm. Choosing the correct electrical cable tray dimensions is a foundational step that ensures project success in the demanding environments of the UAE and GCC. It's more than just fitting cables; it's about guaranteeing safety, meeting local compliance, and building in capacity for future growth. Get it right, and you establish a safe, reliable framework. Our cable trays are engineered to provide safe, organized, and long-lasting cable routing solutions for power, data, and control. We at Ruwais Steel hold a pan-UAE presence to supply cable trays of the highest industrial standards to businesses, factories, manufacturing units, and other setups to create an efficient Cable Tray System that is acclimatized to match any weather conditions.
