

Specifications of a 12-port fiber optic splice box

Preview

Flipped splice tray for easy fiber management Screw type lock gives safety and convenience in operation Internal structure guides safe bend radius Optical fiber radius of curvature: $\geq 40\text{mm}$ Splice tray additional loss: $\leq 0.01\text{dB}$ Temperature Range: $-40^{\circ}\text{C} \sim +60^{\circ}\text{C}$ Compressive. The 12 port fiber splice distribution box is a compact wall-mount enclosure designed for splice-only distribution in FTTH and P2P networks. It is equipped with 12 SC adapters and can work in outdoor environments. offers rugged, compact fiber optic termination boxes designed to organize, protect, and secure fiber terminations and patch connections across diverse network environments. Made from durable polycarbonate (PC) and ABS materials, these wall-mountable enclosures deliver excellent. ITB-258207-12SC-12S-12P is a compact fiber terminal for use at the final fiber termination point in the customer premises.

This Fiber Terminal box is for indoor/outdoor application, with 12 fiber termination capacity (24 fiber for LC connectors). It is usually
